Doraemon	"Although it looks like Route 16 and plays a little like it, it feels much different. The main differences are: mice chase you, your character is a cat. Unlike Route 16, Doraemon gets really slow when one of the mice appears and even slower when the second one appears. But there's an extra. If you collect a ? and press fire, you see the complete labyrinth just like in Route 16 when you leave a room, but a small propeller appears above your head and you can fly to any other room you wish, making the game somewhat easier. You can use this extra 3 times. I'd say that Doraemon feels a bit more relaxed and almost adventure-like than Route 16, which is a much faster game in many aspects (there are also no slow-downs, so it feels much faster)." - Stefan Piasecki.
